

STEVEN PIERCE

JUNIOR SOFTWARE ENGINEER

Ortonville, MI | 248-701-8309 | spierce34@yahoo.com | github.com/spierce34

PROFESSIONAL SUMMARY

Junior software engineer and incoming Georgia Tech M.S. Computer Science student who builds and deploys full-stack, mobile, and computer-vision products. Hands-on experience with Python, TypeScript, React Native, cloud platforms, production operations, and AI-assisted engineering using Codex, Claude Code, and Cursor.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C++

Frameworks: React Native, Expo, Flask, FastAPI, Convex, OpenCV, Ultralytics, MediaPipe

Cloud & Tools: Cloudflare Workers, D1, R2, Stripe, Docker, Git/GitHub, Linux, Windows

AI Development: Codex, Claude Code, Cursor; agent-guided implementation, debugging, testing, refactoring, and code review

SELECTED SOFTWARE PROJECTS

Pole Vault Meet Manager | Production web, iOS, and Android platform

Python, Flask, TypeScript, Convex, React Native, Expo, Cloudflare

- Built and operates a production system for meet and camp registration, organizer administration, athlete check-in, scoring, live results, and mobile clients.
- Shipped native releases to Apple and Google Play and maintains automated unit, smoke, UI, load, stress, fuzz, security, and release validation workflows.

PV Video Capture | Computer-vision capture and clip-delivery system

Python, OpenCV, FastAPI, React Native, Cloudflare Stream/R2

- Developed a multi-camera pole-vault platform for capture, athlete check-in, labeling, Face ID, automated clipping, hosted review, and model-training workflows.
- Integrated OpenCV, Ultralytics, MediaPipe, FFmpeg, PTZ camera controls, GPU-aware recovery, and mobile/desktop tools with documented checks and operational runbooks.

Landon Pole Rental | Cross-platform rental and billing application

TypeScript, Expo Router, Cloudflare Workers/D1/R2, Stripe, Better Auth

- Built an iOS, Android, and web application for pole inventory, rentals, staff pickup/return approval, QR/OCR scanning, waitlists, and role-based administration.
- Implemented organization-scoped authentication, Stripe billing and refunds, scheduled proration, email/push notifications, signed agreement artifacts, and production deployments.

PROFESSIONAL EXPERIENCE

365 Retail Markets - Technical Support Specialist | December 2025 - Present

- Own Zendesk cases from intake through resolution, providing clear client communication and escalating complex incidents through defined support paths.
- Diagnose and configure equipment across Windows, Ubuntu Linux, Android, and iOS; document root causes and recurring patterns to improve support processes.

Oakland University - Pole Vault Coach | September 2022 - Present

- Coach Division I athletes using video analysis and performance data, translating real-world meet and training workflows into requirements for software products.

EDUCATION

Georgia Institute of Technology | Master of Science in Computer Science | **Begins Fall 2026**

Oakland Community College | Associate Degree in Software Engineering | **December 2025**

Eastern Michigan University | Bachelor of Science in Biology and Chemistry | **Completed**
